

Chapter Twenty-Two (b): Sending Automatic Backup Email

Summary of Chapter:

- How to send an auto backup file by email to a certain recipient.

What you need:

- Knowledge of Admin user account and valid password for your Pilot.
- An email address

Software Revision Required:

- Applicable to software revision 5.2.0 > Net/CachePilots

(Net/CachePilot will be referred to as 'Pilot'. All image examples are of a NetPilot.)

Sending a backup email:

- Log on to the NetPilot as shown in Chapter One (b).

- From the left-hand side of the screen, select 'System backup' and then 'Automatic backup'. (All links are highlighted below).

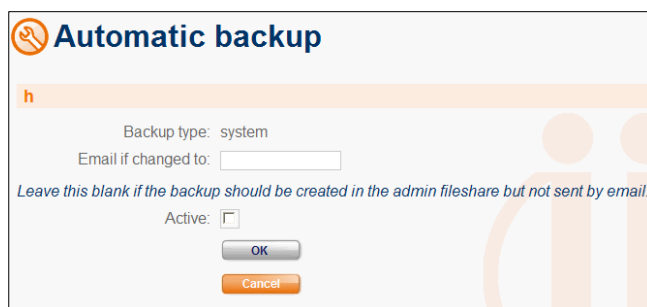

- You will be presented with the screen shown above.

- As you can see on there are four options of which backups can be sent to a recipient via email.

- Daily system backup
- Hourly System backup
- Monthly System backup
- Weekly System backup

- When you highlight any of the options above and select 'Edit', you will be presented with a similar screen as below:

- Enter the email address in the text box provided. Then this backup information will be sent to this email address every hour, day, week or month.

- Put a tick in the 'Active' box to activate the profile.

- Once you have finished select the 'OK' button and again to confirm.
