

## Chapter Six (d): Shutting Down

### Summary of Chapter:

- How to Shutdown your Pilot.

### What you need:

- Knowledge of Admin user account and valid password for your Pilot.

### Software Revision Required:

- Applicable to software revision 5.2.0 > Net/CachePilots

(Net/CachePilot will be referred to as 'Pilot'. All image examples are of a NetPilot.)

### Shutting down:

- Log on to the Pilot as shown in Chapter One (b).

- From the left-hand side of the screen, select 'Power' and then 'Shutdown'. (All links are highlighted below).

- You will be presented with the screen shown above.

- Select the 'OK' button to shutdown your Pilot.

Some of the machines make a noise when they switch off; this lets you know that they are shutting down and saving files. You should only remove the power cable when the noise has stopped and the power light is off.
