

Chapter Seven (c): Adding a Network Time Protocol Server

Summary of Chapter:

- How to add a Network Time Protocol Server to your Pilot

What you need:

- Knowledge of Admin user account and valid password for your Pilot.
- A Time Server name.

Software Revision Required:

- Applicable to software revision 5.2.0 > Net/CachePilots

(Net/CachePilot will be referred to as 'Pilot'. All image examples are of a NetPilot.)

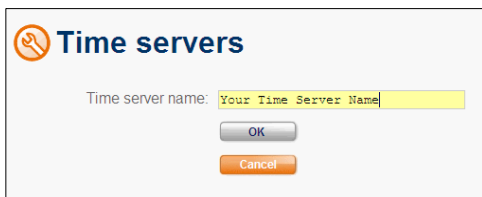

The Pilot comes pre-configured with three servers, which are managed by Equinet.

Adding a Time Protocol Server:

- Log on to the Pilot as shown in Chapter One (b).
- From the left-hand side of the screen, select 'Time and date' and then 'Time servers'. (All links are highlighted below).

- You will be presented with the screen shown above, select the 'Add' button as highlighted.

- In the next screen, enter your time server in the text box provided and select 'OK'.

- You will be reminded to enable NTP, if you have not done this, please select link given. If you have enabled NTP, please select the 'OK' button.
